

MYK AQUAFIN P1

Foaming type Injection Resin for Waterproofing

Description:

MYK Aquafin P1 is a single component, foaming type, highly reactive injection resin waterproofing system for the water bearing cracks and joints in the concrete.

Packing: 1.1 and 5.5 kg Pack

Application Areas:

- Instant stoppage of water inflows from cracks, joints etc
- Touch foam holds water for sufficient time.

MYK Aquafin P1 is ready to use.

Application of MYK Aquafin P1:

Drilling with electric drilling machines along the honey combed area and wall floor joints and fixing PVC nozzles. Pressure grouting should be carried by using hand operated grouting machine through the nozzles starting from one nozzle and stopping the operations when the grout starts coming out from adjacent nozzle, this is done similarly in all the nozzles.

Consumption:

Approximately 1 Kg per Grout point.(depends upon the site condition)
