

MYK SUPERPLAST 200

High performance water reducing and superplasticising admixture for concrete

Description:

MYK SUPERPLAST 200 is supplied as a brown colour liquid. It has been specially formulated to give high workability or to produce high quality concrete with better density and reduced permeability.

Pack Size: 1,3, 5, 10 & 20 Lit Pack

Advantages:

- Improved workability, Increased strength
- Increased quality, Higher cohesion
- Minimized bleeding and segregation.

Usage:

- To produce pumpable concrete
- To produce high strength, high grade concrete by substantial reduction in water resulting in low permeability and high early strength.
- To produce high workability concrete requiring little or no vibration during placing.

Application:

MYK SUPERPLAST 200 directly can be added to the concrete during the process of mixing @ 100-250ml per 1bag of cement.

Dosage: 100-250 ml per 1 bag of cement

Note: - For special cases site trials to be conducted before being used.

Health & Safety

MYK SUPERPLAST 200 is non-toxic. Any splashes on the skin should be washed immediately with water. Splashes to the eyes should be washed immediately with water and medical advice should be sought.

Storage: Store in cool dry place

Shelf Life: 12 months from date of manufacturing.
