

MYK GROUT ADD

Expansive Grout Additive

Description:

MYK Grout ADD is a single component powder Grout additive which is added to cement to produce a free-flow non-shrink expansive grout additive. It is generally used for injection pressure grouting wherever void filling is required and weak concrete structures, honey combed areas etc.

Packing: 250 grams pack

Advantage:

- ❖ Free flow
- ❖ Chloride free
- ❖ Excellent adhesion
- ❖ Higher fluidity
- ❖ Gaseous expansion
- ❖ Compensates plastic shrinkage in cement

Application Areas:

- ❖ Weak concrete structure
- ❖ For Waterproofing by filling pores & cavities
- ❖ Honey combed area, voids etc.

Mixing of MYK Grout ADD:

Add 250 grams pack of **MYK Grout ADD** into the cement (W/C ratio - 0.45) and mixed with a mechanical mean until a homogeneous mass is obtained.

Application of MYK Grout ADD:

Drill holes with electric drilling machines along the honey combed area and wall floor joints and fix PVC nozzles. Pressure grout should be carried by using hand operated grouting machine through the nozzles starting from one nozzle and stopping the operations when the grout starts coming out from adjacent nozzle, this is done similarly in all the nozzles.

Dosage: 250 Grams per bag of cement

Protection:

Use of hand gloves is necessary while mixing the product In case of contact with skin or eyes, use plenty of water to wash and obtain medical helps immediately.

Storage: Store in cool dry place

Shelf Life: 12 months from date of manufacturing.
